Medical Billing is AMI's core business. With over 17 years in business, AMI has the core competencies to significantly increase your revenue stream. State-of-the-art software integrates medical billing functions with scheduling, practice management and real-time reporting.

For the medical practice, this creates visibility into the billing process. Real-time reporting capability provides the physician insight and immediate access to the status of a claim, patient ledgers, accounts receivables, *all from the click of one button.*

Our Medical Billing Services include:

- Scheduling
- Entry of Patient Demographics
- Posting Charges and Payments
- Physician Recredentialing
- Electronic Claims Processing
- Patient Statements
- Reporting
- Negotiating Insurance Company Contracts
- Conducting Meetings with Practices

In most cases, the increase in revenue offsets the cost of the medical billing service.

The Benefits of Electronic Scheduling

•Patient Recalls *Keep track of patients with severe medical conditions to ensure they come back into the office; helps to reduce future liabilities*

Maximized use of physician's busy schedule

•Improve patient flow management

•Reduce confusion *with multi-user scheduling module*

•Provides insight into the practice with valuable reports

•Address insurance pre-certification requirements

•Minimize patient wait times between appointments

•Reporting (Daily Schedule, Call Sheets, Cancellations)

•Automated Appointment Confirmation

Managing the schedule of your practice and tracking patient visits including office, hospital, and other facilities enables accountability for both the practice and the billing organization.

Scheduling
